Notice was also sent to the managers of the fight notifying them of the ultimatum in order that they might stop the mile of tickets if they so desired. ARMY REDUCED TO 66,497 MEN.

President Issues Order Changing Ratio in Make-Up of Permanent Military Establishment.

INFANTRY FORCE TO BE 29,880.

Reduction in This Branch Brought About by Changing Number of Men in Company From 104 to 80.

Washington, May 21 .- By direction of the resident, Secretary Root has issued a general order decreasing the strength of our rmanent military establishment and changing the ratio of its make-up, as provided in the general order issued last May to carry out the army reorganization law. Under the general order of last May the total strength of the army was fixed at 77,287 men. The order issued to-day reduces this figure to \$6,487—a reduction of 19,790. In the cavalry branch of the service the old order specified twelve troops of eightyfive men to each regiment; the new order establishes twelve troops of seventy-five men each. This will decrease the total strength of the lifteen cavalry regiments

In the artillery branch, the coast con-tingent will be kept at its former strength of 125 companies of 109 enlisted men each, or a total of 13,734, but the field artillery will be reduced from thirty batteries of 160 men each to twenty-eight batteries (twentyfive light and three mountain) of 120 men

from 15,840 to 14,040.

Provision is made in the new order for two wege batteries, each with a strength of 193 men, which in addition to light and moun-tain batteries, will give the artillery corps men, which, in addition to light and mountain batteries, will give the artillery corps a total enlisted strength of 17,742 as against the 18,262 men provided in the former order. The new order reduces the number of men to an infantry company from 104 to 50 and the thirty regiments of twelve companies each will now give a total infantry force of 23,850, instead of 38,550.

The strength of the engineer branch remains as formerly, as does also the strength of the staff departments. It will be the plan of the War Department hereafter to divide the arms, as provided in the order issued to-day, into thirds, having one-third of the entire establishment in the Fhillippines at all times, and the remaining two-thirds in the United States and elewhere. By this plan an enlisted man taking six years as a basis, would serve four years in the United States proper, or in Hawaii or in Alaska, to every two years wall or in Alaska, to every two years served in the Philippines.
